Javier Nuñez

Full Stack & Mobile Developer

React · React Native · NestJS · TypeScript · Honduras · Remote (UTC-6)

SUMMARY

Full Stack & Mobile Developer with 4+ years shipping production web and mobile apps with React, React Native, NestJS and TypeScript. Mobile Lead at a fleet-tracking company whose apps track vehicles for clients in Honduras, Guatemala and Nicaragua — 500+ vehicles for a single client. I also build operations platforms and multi-tenant SaaS for small businesses, including a web + mobile platform used daily by a U.S. contractor. Open to remote full-time and contract roles with teams in North America and LATAM.

EXPERIENCE

Full Stack Developer · Mobile Lead

Dec 2023 – Present

Seguridad Móvil GPS

- Lead the architecture, development and releases of two React Native fleet-tracking apps (Optimus CA/MagnoTrack and Optimus Rutas) used by clients in Honduras, Guatemala and Nicaragua, including one account with 500+ tracked vehicles.
- Built real-time GPS tracking, route history, speed-limit monitoring, client-visit management and automated reporting for vehicles and field personnel.
- Implemented continuous background geolocation with TransistorSoft and map-based UIs for live visualization of vehicles and field staff.
- Developed a photo-based reporting system that integrates dashcam data into the platform.
- Own versioning and releases on the App Store and Google Play as the platform expands into North America.

Independent Full Stack Developer

2025 – Present

CodingIQ (freelance)

- **BrightCoat Ops** — client: BrightCoat Painting & Remodeling, Austin, TX. Sole developer of a web + mobile operations platform that replaced the client's spreadsheets for jobs, field scheduling, invoicing, expenses and payroll, with a KPI dashboard and role-based access. In daily production use. React, TypeScript, React Native, Supabase.

> *"Before working with Javier we ran jobs, payroll and invoicing out of spreadsheets. … Now I check jobs, crews and numbers from my phone every day in the field."*
> **David Lopez, Owner, BrightCoat Painting & Remodeling**

- **AssistIQ & ContaIQ** — multi-tenant SaaS for Honduran SMBs: attendance with biweekly payroll hours (in development) and accounting with automatic journal entries and ISV tax support (beta). NestJS, Prisma, React, PostgreSQL.

Frontend Developer

Jul 2022 – Feb 2024

Chekku

- Led the migration of a legacy AngularJS platform to React, improving maintainability and performance.
- Built a dynamic check-in/check-out system with client-configurable forms.
- Built dashboards for visit metrics and map features with geolocation and markers.

Software Development Intern

Jan 2022 – Jun 2022

Seguridad Móvil GPS

- Built internal tools and web apps with JavaScript and Node.js; supported API development and database integration.

EDUCATION

B.S. in Computer Systems Engineering

2022

Universidad Tecnológica Centroamericana (UNITEC), San Pedro Sula, Honduras
